

Carolina ENT
Kim Richard Jones, M.D., Ph.D.

About Dr. Jones

Professional

Dr. Jones was born in Minneapolis, Minnesota and grew up in Florida and Georgia. He attended Florida State University and graduated in 1974 with a double major in Psychology and Biology. He continued in graduate school at Florida State and obtained a Ph.D. in Neurobiology in 1980. This was followed by a postdoctoral fellowship in neurophysiology at the University of Wisconsin.

He attended medical school at UNC-Chapel Hill from 1982-86, and remained at UNC for his internship in General Surgery and four years of residency training in Otolaryngology-Head and Neck Surgery. Following completion of his residency, he joined the Faculty at UNC Medical School in the Division of Otolaryngology. He was appointed chief of Rhinology and Sinus Surgery in 1992, and was later promoted to Associate Professor with Tenure. He left the University in 1998 to open his own practice in Chapel Hill.

Dr. Jones is well-known for his enthusiastic teaching of medical students and residents, and was selected as Teacher of the Year in both 1998 and 2000 by the senior residents in the Department of Family Medicine. He has lectured widely on sinusitis and general otolaryngology, and has contributed articles to a number of textbooks and specialty journals. A listing of his publications can be viewed below:

Personal

In his spare time, Dr. Jones enjoys gardening, reading, working out at the gym, and photography. He is also an avid traveler and backpacker.

Publications

Refereed

Jones, K. R. and Berkley, M. A. *Distribution and temporal response characteristics of evoked potentials in the visually deprived cat.* Brain Research, 1977, **130**, 572-578.

Spear, P. D., Jones, K. R., Zetlan, S., Geisert, E. E., and Kornguth, S. *Effects of antibodies to large ganglion cells in the cat's retinogeniculate pathway.* Journal of Neurophysiology, 1982, **47**, 1174-1195.

Jones, K. R. and Berkley, M. A. *Loss of temporal sensitivity in the dorsal lateral geniculate nucleus and area 18 of the cat following monocular deprivation.* Journal of Neurophysiology, 1983, **49**, 254-268.

Jones, K. R., Spear, P. D., and Tong, L. *Critical periods for effects of monocular deprivation: Differences between striate and extrastriate cortex.* Journal of Neuroscience, 1984, **4**, 2543-2552.
